University of Texas Rio Grande Valley - Computer Science Tutor

Brownsville, Texas *January 2022 - December 2024*

- Instructed 50+ students in collaborative coding practices, **improving project efficiency and code quality**.
- Facilitated group study sessions promoting **peer-to-peer learning**.
- Guided students on **writing clean, maintainable, efficient code** and prepared them for technical exams.
- Supported course instructors by reviewing assignments and providing feedback, contributing to higher pass rates in introductory programming courses.

Education

University of Texas Rio Grande Valley

Bachelor of Science in Computer Science

Recent Projects

Sales Data Analysis & POS System (In Progress) <https://github.com/Manuvv01/POS-System>

- Developed a sales tracking system using Python and pandas to process and analyze transactional data
- Cleaned and structured Excel-based datasets to enable efficient querying and reporting
- Analyzed product performance and revenue trends to identify top-selling items and sales patterns
- Designed data models to support daily and monthly sales analysis
- Preparing to build interactive dashboards to visualize key business insights

Password Manager <https://github.com/Manuvv01/Password-Manager>

- Built a Python desktop application with custom GUI for credential storage
- Implemented **AES encryption and hashing** for secure local JSON storage
- Developed USB hardware authentication layer restricting unauthorized access
- Technologies: **Python, Tkinter, Cryptography, JSON**

Certifications

- *Google Data Analytics by Google - Coursera | May 5, 2026*
- *DeepLearning.AI Data Analytics – Coursera | March 2026*
- *IBM JavaScript Backend Developer – Coursera | October 2025*
